Our swing sets are constructed using #1 or better outdoor pressure-treated lumber. We use only stainless steel screws, lags and swing swivels, or fasteners approved for pressure-treated lumber.

From lumber that is milled to a smooth finish with rounded edges to protect from splinters, to grab handles and railing, we keep your children in mind when we manufacture our swing sets. Adult supervision is recommended anytime children are playing on swing sets. For added safety we recommend a 6' perimeter around your entire set.

The manufacturer reserves the right to change or modify swing sets and accessories without notice, to further enhance child safety and enjoyment.

With a little care and maintenance, these swing sets will last until your child is grown. We recommend checking bolts, lags and other fasteners periodically for tightness.

**All products can be finished with water sealer**
